

We are committed to making the FACO S.P.A. website easy to use and accessible to everyone. Below is an overview of how to navigate and interact with our website:

- Navigation: The main menu, located at the top of every page, provides access to the different sections of the site, including information about the company, products, and contacts. If you're using a keyboard or assistive technology, you can navigate between interactive elements (such as links and buttons) using the Tab key, and activate the selected item with the Enter key. A clear focus indicator highlights the current element in use.

A "Skip to content" link is available at the beginning of each page, allowing keyboard users to bypass repetitive elements like headers and go directly to the main content.

If you require additional support when using any part of faco.it, please contact us. We are happy to provide personalized assistance or further clarification to ensure smooth and inclusive access to the site's features.
